Thank you for choosing Scott Drake styled steel wheels for your car. We have gone to great lengths to insure the highest degree of workmanship and quality materials are used to manufacture our styled steel wheels. Please read and carefully follow the mounting and balancing instructions below. **FAILURE TO FOLLOW THESE INSTRUCTIONS WILL RESULT IN IMPROPERLY BALANCED WHEEL AND TIRE COMBINATIONS.**

LUG CENTRIC BALANCING ONLY

Scott Drake styled steel wheels are lug centric which means they are centered from the lugs not the hub. They are designed and manufactured to be balanced using the lug centric method. This is the only approved balancing method. Cone balancing or "coning" will not properly balance the wheel resulting in vibration or shaking at speed. **DO NOT BALANCE THIS WHEEL USING A CENTERING CONE.** Verify that the installation facility you choose is equipped with a lug centric adapter and the technicians are trained to use the equipment.

IMPORTANT BALANCING INSTRUCTIONS

Your new styled steel wheels need to be "Lug Centric" balanced. This properly aligns the wheel by using 5 lug holes, and is the most accurate form of balancing. This method balances the wheel and tire exactly as it will be mounted on the vehicle. "Cone" balancing is a common method of balancing and some smaller tire shops may not offer "Lug Centric" balancing. Cone balancing assumes that the small hubcap hole and the large backing plate hole are both on true center of the wheel. We have gone to great lengths to align both holes on true center but due to the complexity of the wheels construction, the center holes should not be relied on to center the wheel on a balancer. If you attempt to balance this wheel using the coning method and it does not balance, **DO NOT** return rim to the supplier, it is not defective. Request that it should be "Lug Centric" balanced. All rims have been tested for trueness and will balance on a lug-centric balancer. We do not recommend cone balancing.

If you are unable to balance this rim on a "Lug Centric" balancer, return it to Scott Drake and we will repair or replace it at no charge. (All returns must be accompanied with official paperwork from the tire shop stating that they could not balance rim using a "Lug Centric" balancer.)

WARRANTY INFORMATION

Scott Drake Styled Steel Wheels are warranted for 1 year from the date of purchase (up to a maximum of 15 months from the date of manufacture). Warranty covers defects in chrome and workmanship. Warranty does not cover damage due to abuse, neglect, curb side scrapes and acid stains (including animal urine). If manufacturer determines wheel is not repairable, the wheel will be replaced. Warranty only covers repair of defective wheel, and does not cover shipping, installation or labor charges.

** Please call Scott Drake Customer Service for a Return Authorization (RA) before returning any product. Proof of purchase and dated receipt must be present with any return. All returned products are tested and if found to be damaged by the installer, no replacement will be issued. You pay the cost to ship to us, we pay for the return shipping. Guarantee does not include any labor and/or tax charges incurred.*

This is the Haweka Lug centric balancer adapter we use on our Hunter Road Force GSP9700 balancer to check and test our wheels.
